First Came The Barcelona Principles

A set of *principles* to guide the practice of PR and social media measurement:

- 1 Goal Setting and Measurement are Fundamental to Communication and Public Relations
- 2 Measuring Communication Outcomes is Recommended Versus Only Measuring Outputs
- 3 The Effect on Organizational Performance Can and Should Be Measured Where Possible
- 4 Measurement and Evaluation Require Both Qualitative and Quantitative Methods
- 5 AVEs are not the Value of Communication
- 6 Social Media Can and Should be Measured Consistently with Other Media Channels
- 7 Measurement and Evaluation Should be Transparent, Consistent and Valid

After the Barcelona Principles, industry associations came together to create standards of best practices for measuring PR & social media

In 1999 PR was shown to deliver more value

- ▶ P&G found that PR delivered 8 times the value of TV and 4 times the value of trade advertising.
- ▶ Three of the six products showed PR with the highest ROI of any marketing tactic
- ▶ Overall PR delivered a 275% ROI

PR delivers more results for less money

- ▶ Miller discovered that PR campaigns generate 4% of incremental sales compared to 17.3% of incremental sales for TV.
- ▶ However, PR delivered that 4% for less than 1% of the budget.
- ▶ AT&T found that PR delivered customers at a fraction of the cost
